Lug Nut Covers	10
Jam Nuts	11
Bolt Covers & Tools	12
Valve & Stud Extenders	13

Kaper II / Woody's personnel extend thanks to you for having interest in our wheel products. Kaper II pioneered the development of stainless steel wheel simulators in the early 1980's. We continue to develop new products to meet the needs of an ever changing transportation industry. All of our simulators are manufactured with 304 grade stainless steel which offers exceptional corrosion resistance. You will find that our simulators have been engineered for precise fit with applications ranging from 15" wheels used on light duty vehicles through 24.5" heavy duty wheels. Each set of simulators will provide years of service. Use of mild soap and water is all that is required to maintain a brilliant shine. If you need assistance in selecting the correct product for your application, please give us a call at 1-800-336-2011.
